Who is TelCyte Infrastructure Services?

TelCyte, LLC is a full-service telecom and infrastructure solutions provider. We take a systematic approach to getting to know our client and their needs, so that we can develop a comprehensive engineering solution to bring projects from conception through to completion; on time, within budget, and will deliver a product with the utmost quality and attention to detail.

TelCyte LLC, was founded by a team of industry leaders, who have been working together for over 15 years. Our extensive knowledge in telecommunications and infrastructure provides a solid foundation for a successful design firm. With a focus on current and future technology always in sight, we consistently are keeping up with the latest innovations and provide state-of-the-art design solutions for our clients. TelCyte continues to look for strategic acquisitions as well as potential joint ventures to expand with our clients and continue to provide them with a product they have come to expect.

TelCyte is currently licensed in numerous states, with partnering relationships throughout the United States and Canada to fulfill all of our clients' requirements.

Our Vision

To lead by example! In today's fast paced world, it is imperative that a business operates within predetermined processes and structure, to provide the company, employees, suppliers and client's the fundamental tools to operate and be successful. Communication is not only the foundation of our company but the namesake of our industry in itself, and with that we take great pride on it being a focal point in our ability to meet and exceed industry expectations.

INFRASTRUCTURE SERVICES

Solutions Today for Tomorrows World!

Field Services

TelCyte field technicians are experts in the telecom and infrastructure industries and assist with the rollout, installation, operation and maintenance of telecommunication networks and utilities.

Assigning the key field services team is crucial to successful implementation, documentation and in providing the foundation for a variety of related services. TelCyte responds with a successful track record, a deep know-how, a strong team of experienced personnel and a well-structured organization to deliver customer satisfaction and trust.

Benefits:

- Significant cost savings and risk-free results
- Minimized downtime and more satisfied clients due to the fast and direct response.
- Maximized system performance and getting the most out of infrastructure value.
- Harnessing all technology burdens to allow customers to focus on core business and not on field support.

PROJECT MANAGEMENT

Solutions Today for Tomorrows World!

Project Management

Telecom and Infrastructure projects are generally very complex and they need to be managed by someone who has very specific skill sets. The typical Project Manager is not familiar with the various technologies our industries are comprised of, nor are they intimate with the provisioning processes, vendor roles, and the timelines associated with implementation from each individual vendor.

Our Telecom and Infrastructure Project Managers provide a single point of control for the projects they oversee and ensure the proper flow of information to all parties.

TelCyte eliminates the time and waste that can accompany carrier-led telecom and infrastructure implementation for wired, wireless carrier and utilities.

Solutions Today for Tomorrows World!
